

SHEET INDEX	
0000	1 - 7 of 2
AC-BUSBAR	4 sections
ALL POWER	4 sections
CONTROL	4 sections
DC-LINK	4 sections
INVERTER	4 sections
VERINA-PC	1 sections
see D-1 - 28 sections - 228 components	

```
graph TD; A[NET NAMING] --> B[Internal junctions are named for what they join]; A --> C[Issues, mostly under all that C-jobs e.g. LEVICO, ZBP]; C --> D[Problems - BE consequent of a worse part e.g. RAGLETA, M]; C --> E[Problems - minor bug between Ruckelshausen e.g. RYVIZ, OT]; D --> F[All others are explicit storage units];
```

MAGNETICS CONSTRUCTION	
Identify any discontinuities and Joints, gaps, etc. acceptance does free them)	
RT LABS CG 36 T79 this weldset (437A05.05 AL37) Weld = 1 set rim = 142 mV/cr, =0.68T @ 100kA psi (250)	
and 125H-0 36 T27 30k, Weld, 20 weld = 15 inch @ 175kA psi (200 11 April, 221 retained stress 11.4 - met)	
total Ld = 1 km = measured after leakage (20% DISCONTINUITY leakage spread); Cr at TANK sections
