NET NAMING

Internal junctions are named for what they join

Usually, *o* prefix made at that IC pin e.g. 15VCCA, VDDP

Resistor: *R* midpoint of a series pair e.g. R3A/L3A, R

Resistor: *res* top between Resistorname e.g. R1D3, 01

all others are explicit design notes

MAGNETICS CONSTRUCTION

Identify your demagnetization and Purvis, pp3, 104, acceptance times less than 10
