NET NAMING

Internal junctions are named for what they join

Isolate, offets made at that C-join e.g. UFD4, VBP

Problem: 31 endpoint of a series past e.g. RBA475, M

Problem: same tag between Rodenbach e.g. RW12, 31

all others are explicit design notes

MAGNETICS CONSTRUCTION	
Identify per declassification and Burns, gap, Wt, acceptance times from items)	
D1 LAA-CCO-5a T79 55c second, N=02, 15.0mm) = 50.0m @ 125.54 ps	
DE L28H-0-3a T57 50u, N=04, 26.0mm) = 12.0m @ 136A ps (Show 1.4u)	
Send C/N=0 values printed at the TMRG sections
