NET NAMING

Internal positions are named for what they join

Supply - often made of four C pins e.g. SUPPLY, VDDP

Reference - 0V multiple of a series pin e.g. REF0, REF1, 0V

Reference - other top between Reference e.g. REF12, 0V

All others are explicit design nets

MAGNETICS CONSTRUCTION

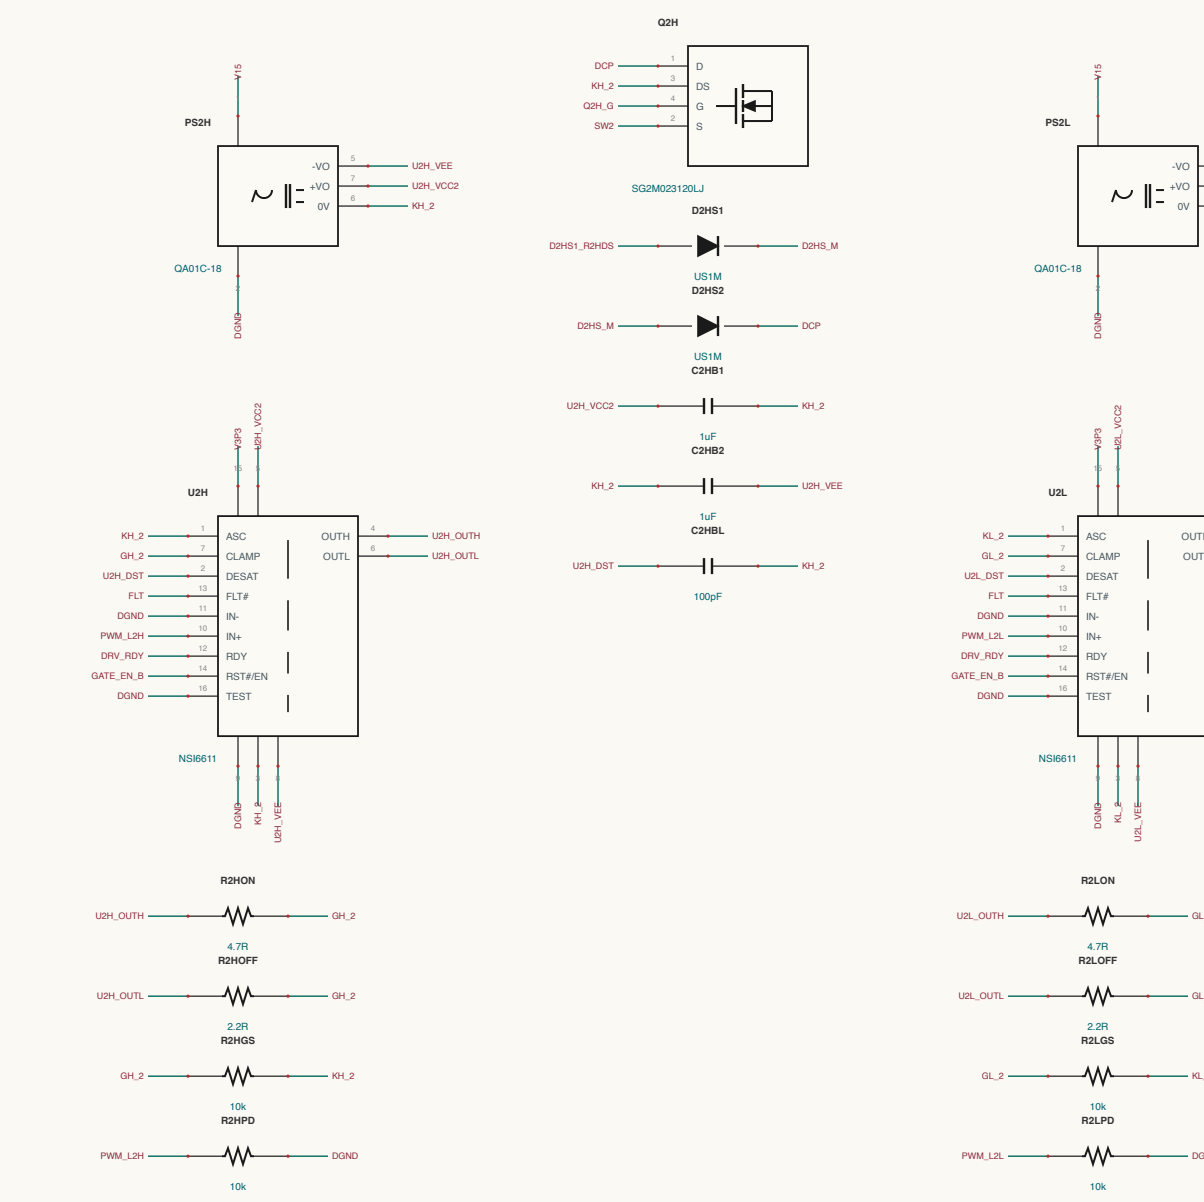

Identify per manufacturer and during gap, fill, acceptance tests (see flow)

0.71-7.72 (x 0.0001) per section, 0.00 (0.001)

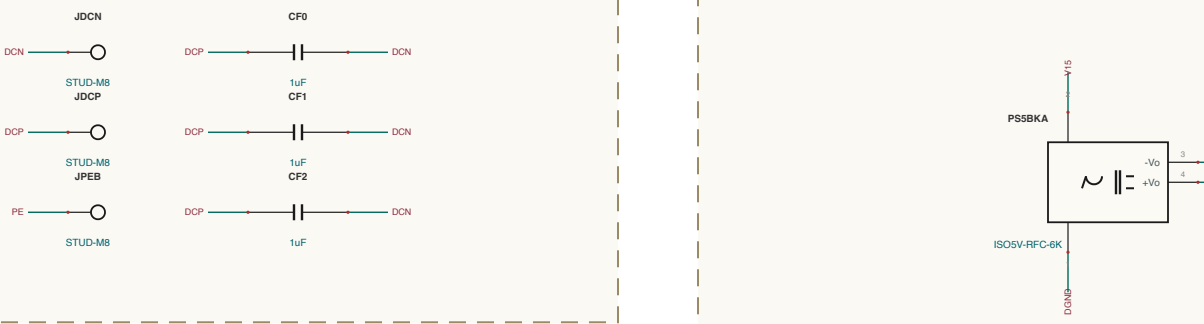

0.11-1.11 (x 0.0001) per section, 0.00 (0.001)

Gap Control pin values printed at the TANK sections
