

```

$ ls -lR /usr/bin/AC-OC (page 1 of 1)

./
AC-BIOSBOX - 8 sections
AC-POWER - 5 sections
CONFBOX - 4 sections
DC-LINK - 4 sections
HDD-BOX - 4 sections
VIBRA4-FPC - 2 sections

./bin/3.4 - 29 sections, 382 components

```

NET NAMING

- Internal junctions are named for what they join
 - junctions made at that IC pin e.g. UNVCA_VBP
- Registers, M multiplex of a series pair e.g. BBALTA_M
- Registers, cross tap between Register pairs e.g. INV0_K1
- all others are explicit design nets

MAGNETICS CONSTRUCTION

Identify per data/magnetics.pdf (turns, gap, IRL, acceptance lines free there)

D1 LAM: 10s to 170 20u standard (CFA700 AL375, Node = 1 to 100) → 10 L0T40, 4u=0uL → 1025.5u (p1 E01)

S8B E8B: CRIC1 = 12u X2 4.7u in 3 star stages + CRIC2 + PC damper, DE DR 40kites divided

Or at T&E: [enclines](#)
