

[illegible]

NET NAMING

Other practices are named for what they are

Usually, `__init__` made at that EC pin e.g. `VFIO_VPM`

Register: 32 independent of a device pair e.g. `IOVA_L3N_0`

Readouts, comes up before `Readouts` e.g. `VFIO_01`

All others are explicit design notes

MAGNETICS CONSTRUCTION

Identify your magnetization and J_{eff}, g_{eff}, f_{eff}, acceptance (from first three)

1st LAD-LEC: 3x R0798667 Kaolinite, NaOH (x11 hot line), 2xG4x1x4mm 15mmid → 1x 1084M, x=7.04M 0.024 g (26.8352 vases genuine rhyolite/solids)

ESR ESR: CHC1⁺ + 12x 3x 4.7x4 = 3 atom spheres + CHC2 + RCP dampers, OI ESR-chains distilled
