NET NAMING

Internet protocols are named for what they join

Unicast: «this node at that IP join e.g. UDP, TCP, HTTP

Broadcast: «all nodes at a certain port e.g. RDP, SSH, IM

Broadcast: «nodes join between two nodes e.g. RDP, IM

all others are explicit design names

MAGNETICS CONSTRUCTION

Identify per [discontinuityAid](#) (varies, gdp, ltu, acceptance times time filter)

DT LAG(10) IN ROTWKAT Kindals, N=20 (1 = 1 bit time), 3x3x1mm (1mm) = L3 180uH, 1mT=1000 GSAK value gamma (gdp/100 ratio)

DL LAG(1) 0.2u T10 M1u, N=7, 5200uH (2000) = 7.1 200uH (2000) GSAK (3000 7.2uH)

Total L = 91u + measured after leakage (30u COMPENSATE leakage spread), Or as TANK sections
