

[illegible]

NET NAMING

Internal junctions are named for what they join

Unsurp. $\rightarrow$ offPU mode at that C, join e.g. UFDPA, VDP

Problems: $\rightarrow$ offPU of a vertex pair e.g. $\overline{98A173}$, M

Problems: $\rightarrow$ enter top between $\overline{98A173}$ and e.g. $\overline{98V12}$, $D1$

all others are English design notes
