

[illegible]

NET NAMING

internal junctions are named for what they join

Usual: `_*ffifo_vnode` at final IC join e.g. `USFOA_VSDP`

Backtick: ``` for midpoint of a section pair e.g. `BSALTA_W`

Backtick, `_*` join before Frodothorin e.g. `FRID_01`

[all others are explicit design notes

MAGNETICS CONSTRUCTION
